DETAILED ACTION

Species Election

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.
2. The species are as follows: an amino acid synthon where the C-terminal group is joined to a water soluble polymer via a thio- or selenoester.
3. Applicant is required, in reply to this action, to elect a single species (i.e. a chemical structure in which all variables of the chemical formula in claim 29 are fully defined including Y, R₁, n₁, R, n₂, n₃, X and R₃, a chemical structure in which all variables of the chemical formula in claims 53 and 55 are fully defined including PG, Y, N, L₃, R₁, L₂, n₁, R, n₂, n₃, X, R₃ and L₁, or another amino acid synthon where the C-terminal group is joined to a water soluble polymer via a thio- or selenoester with a completely defined chemical structure) to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.
4. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 1654

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. The claims are deemed to correspond to the species listed above in the following manner: claims 1-44, 54 and 55 are drawn to the generic species, claims 45-53 and 56 are drawn to synthetic methods, and claim 57 is drawn to a method of using the generic species in chemical ligation.

6. The following claim(s) are generic: 1-57.

7. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: they are alternative chemical compounds of a Markush group having a common activity (use in chemical ligation reactions) and a common structure (an amino acid synthon having an N-terminal group joined to a C-terminal group through an organic backbone, wherein said C-terminal group is joined to a water-soluble polymer through a thioester or a selenoester).

Conclusion

8. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

9. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

Art Unit: 1654

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

10. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

11. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christina Bradley whose telephone number is (571) 272-9044. The examiner can normally be reached on Monday through Friday, 8:30 A.M. to 5:00 P.M.

13. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cecilia Tsang can be reached on (571) 272-0562. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
